

BMA Inc. Services for Lean Accounting & Management

BASIC LEAN ACCOUNTING

- Lean Accounting Assessment
- Lean Accounting Training
- Definition of the Company's Value Streams
- Develop Lean Performance Measurements
- Develop Value Stream Accounting
- Develop the Value Stream Capacity Analysis
- Make Better Decisions Using the Box Score
- Transaction Simplification and Elimination

The new performance measurements replace the previous measurements. Financial reports are implemented in parallel with current accounting and control systems. New decision-making replace the current methods.

LEAN IN THE ACCOUNTING PROCESSES

- Visual Management of Accounting & Admin Processes
- Month-End Close & Financial Reporting
- Create Flow in Cash Disbursements
- Create Flow in Cash Receipts
- Labor Reporting and Payroll Processing
- Lean Budgeting
- Quoting, Pricing, and Profitability
- Inter-Company Transfer Pricing

This lean continuous improvement of the financial processes can be done before to after Basic Lean Accounting. Applying lean in the accounting processes improves the processes, provides knowledge & experience in lean thinking and methods, and frees up the finance people's time.

ADVANCED LEAN ACCOUNTING

- Workshop: Value Stream Management.
- Features & Characteristics Product Costing,
- Valuation of Inventory without Standard Costs
- Simplify or Eliminate Standard Costs
- Sales, Operations, and Financial Planning (SOFP)
- Lean Accounting for New Product Development

These advanced processes are completed after the Basic Lean Accounting. This is where the traditional accounting processes are switched off in favor of Lean Accounting.

Basic Lean Accounting is implemented in the sequence shown. It takes 4-6 months & 4-6 kaizen events.

Advanced Lean Accounting replaces the traditional accounting processes.

The Lean Management System topics are implemented in the sequence of need. Introduce visual management as quickly and as widely as possible.

LEAN MANAGEMENT SYSTEM
